INDEPENDENT INSPECTION & PROJECT SERVICES

We provide independent, impartial and integrated Third-Party Inspection, Expediting and Project Support Services to the Oil & Gas, Power, Engineering and Industrial sectors.

Our services support clients, EPC contractors, manufacturers and project stakeholders throughout the procurement, fabrication, manufacturing, inspection and project execution stages.

INSPECTION
TODAY
A SAFER
TOMORROW

Independent Inspection Services

Safety-focused third-party inspection, testing and witnessing to ensure conformance with client specifications and applicable codes and standards.

Expediting

On-time and effective expediting support from early stages to delivery, to ensure project schedules are achieved through systematic management and close follow-up with manufacturers and suppliers.

Vendor Assessment

Audit and assessment services to evaluate manufacturers and sub-suppliers for capacity, quality systems and compliance with client and project requirements.

Provision of Project Resources

Provide skilled and experienced project resources to support inspection, quality assurance, supervision and project execution activities.

Management System Audit

Audit of quality, health, safety and environmental management systems to verify implementation and continual improvement in line with project and international standards.

Project QA-QC Management

Project-focused QA/QC management to plan, implement and monitor inspection, testing and documentation activities in accordance with client specifications and applicable codes.

Pre-Shipment Inspection

Inspection and witnessing at supplier premises prior to shipment to ensure compliance with purchase specifications and project requirements.

Design Review

Technical review of design, engineering documents and calculations to ensure compliance with project specifications and recognized international standards.

Utility Equipment Inspection

Inspection of static and rotating equipment, pressure systems, piping, tanks and associated utilities to ensure integrity, reliability and safe operation.
